PRIVATE LIMITED**

ABOUT US

Prathay

Prathay Energy Private Limited is a leading energy and infrastructure solutions company specializing in electrical contracting, renewable energy, telecom infrastructure, and advanced Battery Energy Storage Systems (BESS). We provide reliable, efficient, and sustainable solutions tailored to meet the evolving requirements of industrial, commercial, and utility sectors.

Driven by innovation, technical expertise, and a commitment to quality, we deliver end-to-end services from project planning and execution to commissioning and maintenance. Our focus on safety, performance, and customer satisfaction enables us to build long-lasting partnerships while supporting the transition toward smarter, cleaner, and more sustainable energy solutions.

VISION & MISSION

Vision

To be a pioneering force in sustainable energy infrastructure, powering communities and industries with innovation and responsibility.

Mission

To accelerate the transition to clean energy, uplifting lives through smarter management of Time, Energy, and Money.

OUR SERVICES

Prathay

Electrical Contracting & Infrastructure Execution

Prathay Energy provides end-to-end electrical infrastructure solutions, covering engineering, execution, testing, commissioning, and maintenance for industrial, commercial, utility, and renewable energy projects.

Telecom Infrastructure & Connectivity Backbones

We build robust passive infrastructure including tower foundation execution, IBS (In-Building Solutions), and high-capacity fiber optic cabling to connect communities and industries across India.

Renewable Energy & Solar EPC Solutions

We provide complete Engineering, Procurement, and Construction (EPC) services for high-yield solar installations. Our engineering teams optimize site geometry, coordinate utility-scale solar farms, and execute robust electrical coupling.

Battery Energy Storage System (BESS) Infrastructure

We design and execute turnkey containerized battery storage configurations to balance energy grids. Our systems enable modern industries to perform peak shaving, frequency regulation, and seamless load shifting.
